

Well, ladies and gentlemen, here are some vital statistics which verify the fact that Mother Nature prefers females and pampers them precisely because females are the source of continuing a species, so females are the perfection which nature intends at conception - since female both conceives and bears the child and nourishes it she has two kinds of sexual organs, a womb which bears life and breasts which nourish the life born. Males, therefore have only one sexual organ and are Mother Nature's second thought so that if the hypothalamus does not "kick in" on or about the twenty-eighth day, then testosterone is not secreted thereby developing testes; if such does not occur, then Mother Nature goes on her merry way to produce a woman! Therefore, gentlemen, when you look in a mirror, just thank Mother Nature (God) for the gift of a life which is Nature's second thought!

The Weaker Sex
By MAGGIE JONES

Men start out ahead: 115 males are conceived for every 100 females. But it's downhill from there.

- The male fetus is at greater risk of miscarriage and stillbirth.
- Male births slightly outnumber female births (about 105 to 100), but boys have a higher death rate if born premature: 22 percent compared with 15 percent for girls.
- Overall, more newborn males die than females (5 to 4).
- Sudden infant death syndrome is one and a half times as common in boys as in girls.
- Boys are three to four times as likely to be autistic.
- Boys are three times as likely to have Tourette's syndrome.
- Mental retardation afflicts one and a half times as many boys as girls.
- Dyslexia is diagnosed two to three times as often in boys as girls.

- As teenagers, boys die at twice the rate of girls.
- Boys ages 15-19 are five times as likely to die in a homicide.
- Boys ages 15-19 are almost 11 times as likely to die by drowning.
- Boys ages 16-19 are nearly twice as likely to die from a car accident.
- Men are 16 times as likely as women to be colorblind.
- Men suffer hearing loss at twice the rate of women.
- Though women attempt suicide two to three times as often as men, four times as many men actually kill themselves.
- The male hormone testosterone is linked to elevations of LDL, the bad cholesterol, as well as declines in HDL, the good cholesterol.
- Men have fewer infection-fighting T-cells and are have weaker immune systems than women.
- Men have a higher death rate from pneumonia and influenza than women.
- By the age of 36, women outnumber men.
- Men ages 55-64 are twice as likely as women to die in car accidents.
- Men ages 55-74 are twice as likely as women to die of heart disease.
- In the United States, men are twice as likely to die from parasite-related diseases (in part, some speculate, because their greater average size may offer parasites a bigger target).
- Among people 65 and older, men account for 84 percent of suicides.
- Stroke, cancer, diabetes, heart disease and accidents -- all among the top causes of death -- kill men at a higher rate than women.
- American men typically die almost six years before women do.

- By the age of 100, women outnumber men eight to one.
- The good news? Men who live to be 100 tend to be in better shape than their centenarian female counterparts.
